

Are you ready to join an inclusive workplace that values diversity and collaboration? Windlab is hiring and we want you to join our team.

Exciting opportunity for a site based Environmental Advisor. The position is a project-based role fixed term for 2 years, with a FIFO roster of 10:4 from Brisbane to Townsville.

About Us

Windlab is the 100% Australian global renewable energy company championing the nation's clean energy transition. We recognise that we operate on the traditional lands of First Nations peoples who have a continued sacred connection to Country, and with that comes responsibility. Our long-term commitment for reconciliation is to build respectful, trusting, and mutually beneficial partnerships with Traditional Owners and embed respect for Aboriginal and Torres Strait Islander cultures, stories, and knowledge in everything we do.

About the Role

As the Environmental Advisor, you'll deliver expert guidance to our construction team on environmental matters. Your role entails supervising contractor performance in executing civil and high voltage infrastructure projects, with a critical focus on ensuring compliance. You'll manage field operations, ensuring the effectiveness and proper management of environmental controls.

Who we are looking for!

As an integral part of our construction project team, you'll bring extensive expertise in environmental management to the table. Your background encompasses project development, impact assessments, permitting, erosion sediment control and construction.

Additional skills/experience

- A minimum of 5 years of relevant work experience in environmental management including experience in a site based role in construction, mining, or land rehabilitation.
- Previous experience with field environmental monitoring techniques, including water quality testing and sampling, vegetation and weed identification, soil sampling and contamination management, nuisance (dust and noise) monitoring and data analysis.
- High level skills and experience in Erosion and Sediment Control.
- Sound analytical, auditing and investigation skills.
- Demonstrated positive and flexible attitude with a willingness to take on a wide range of diverse tasks and adapt to changing priorities.
- Experience and ability to issue Environmental Permits for construction activities.
- Knowledge of local, state, and federal environmental regulations
- Experience developing and / or implementing an environmental management system including incident and risk management, compliance, due diligence, and operating procedures. Knowledge of and demonstrated ability to advise on and respond to statutory obligations in respect to QLD and Commonwealth environmental legislation and government agency requirements.

- A current Australian driver's licence

You will be team-oriented and dedicated to delivering excellence. With outstanding communication skills and the ability to collaborate with diverse stakeholders, you will thrive in this role. Get brand awareness and take your passion for renewable energy to the next level!

Windfarm delivery experience would be an advantage. We are looking for someone who can make a real impact.
